

Selecting the appropriate door size and rise for your pet(s):

	Door Opening	Pet Weight (Up to)
Small Door	5" x 7"	12 lbs.
Medium Door	8" x 11"	40 lbs.
Large Door	10" x 15"	100 lbs.
Extra Large Door	13 ¾" x 23"	220 lbs.

- Use the opening sizes noted above as a guide only. Make sure your pet(s) can pass through the opening size you select.
- Refer to the Pet Door Sizing Guide to determine **your** doors minimum rise. Most patio doors will fall between 5"-7" after installation. We use 5" in the examples below. Doors with thicker bottom rails will be higher.

RISE: Rise plus opening height should total 1"-2" above the tallest point (shoulder) of your pet's back. Additional rise can be added at the time of ordering. Adding rise raises the pet opening up to increase step over height and your pet's ability to pass through without hitting the top of the opening.
